

Working Groups

A working group (WG) consists of practitioners, academics and researchers who work together to address a specific area in Grid Computing and provide technical advice to the NGSC and the NGO in their respective areas of specialization.

The objectives include, but are not limited to the following:

- To explore and investigate areas of focus for the WG. This may take the form of providing comments on technical specifications (such as on networking, commercial certification authority, and grid schedulers); and
- To develop and/or recommend solutions for use by the NGO and the grid community, in particular the VGCs.

Working Group	Leader
Architecture & Middleware	Dr. Simon See
Governance & Policy	Prof. Steven Miller
Networks	A/Prof. Francis Lee Bu Sung
Grid Security	A/Prof. Daniel Tan Tiong Hok

Special Interest Groups

The SIGs provide a forum where individuals are involved in the "nuts-and-bolts" aspects of specific Grid implementations. Interested practitioners come together to brainstorm and share experiences in their area of interests. The SIGs offer a channel to promote the adoption of technologies in their specific areas.

SIG	Leader
Access Grid	Jon Lau
System Administration	Ong Guan Sin
PC Grid Computing	Tan Chee Chiang
