## Intalio Opens Cloud Computing Center of Excellence in Singapore

### New R&D Center will develop business applications for Intalio|Cloud

PALO ALTO, Calif., Nov. 9 /PRNewswire/ -- Intalio, Inc., the Enterprise Cloud Company, today announced that it would develop a Governance, Risk Management and Compliance (GRC) application and a Partner Relationship Management (PRM) application for use on top of its award winning Private Cloud Computing platform. Both applications will be delivered as part of an integrated solution incorporating Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS) layers from Intalio.

Intalio is also announcing that it is establishing an R&D center in Singapore to support its development efforts and to foster innovation in the region. Intalio recognizes Southeast Asia as a high growth market for IT solutions including cloud computing and Software-as-a-Service (SaaS). Intalio's main customers in Southeast Asia include several Fortune 100 banks, Mitsubishi Corporation, Mitsui, and NTT Data.

"Cloud computing hastens the pace of Infocomm Technology becoming the 4th utility, after electricity, gas and water, for businesses," said Andrew Khaw, Senior Director, Infocomm Development Authority of Singapore (IDA). "Cloud computing technologies offered by industry players such as Intalio will help to catalyse and accelerate business innovations on cloud computing. We see Singapore-based companies playing a keystone alliance role in bridging talent to trigger the growth of cloud computing in Asia."

Intalio has selected Singapore for its R&D center because of its diverse talent pool, and because its strategic location makes it a good launch pad to the Southeast Asian market. In addition, it will be able to tap on Singapore's new nationwide broadband network capable of up to 1Gbps per end user connection to be fully rolled out by 2012. Intalio's cloud computing platform will further spur adoption of the fiber network through a range of applications for both private and public sectors.

"Intalio Pte Ltd has been established in February 2009 and is already helping many Intalio customers in Southeast Asia," said Arnaud Blandin, Managing Director of Intalio|APAC. "Southeast Asia is proving to be a thriving market for us, and we have great expectations for our private cloud offering there. Having a local R&D team along with a local support organization means a lot to our Asian customers, who usually expect a very high level of product quality and professional services."
