About the Singapore Grid Forum

The Singapore Grid Forum was established in November 2006, as a society registered with the Registrar of Societies, Singapore, to provide a forum for interested parties to participate in Grid Computing activities in Singapore.

Its objectives include:

- a) To promote the growth and development of knowledge in and usage of Grid Computing and any related subject.
- b) To promote and/or organise trade/business, professional, social, and recreational activities among members of the Society;
- c) To foster close links with other associations and organisations associated with the Society;
- d) To arrange to be written or made, and to print, publish, issue, exhibit and circulate freely or otherwise, reports, periodicals, pamphlets, photographs, books, films, or any materials as may be thought desirable in connection with the objects of the Society;
- e) To raise funds and to obtain assistance through patronship, donations, sponsorship or otherwise for the attainment of any or all the objectives of the Society to the intent that the funds of the Society, however derived or obtained, shall be applied solely towards the costs and expenses incurred in the attainment of any or all the objects of the Society; and
- f) To do all such other things incidental or conducive to the attainment of any one or more of the above objects.
